Experience

Frontend Developer Support

Dec 2022 - Current

Frontend Simplified

- Supported students using HTML, CSS, Flexbox, JavaScript and React best practises
- Utilized debugging best practises using Google Chrome inspect element tooling
- Simplified difficult programming concepts including responsive website development, CSS layout, Promises and API requests
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

Projects

GameLand | [Website](#) | [GitHub](#)

- A gaming website built with Next.js, React, TypeScript, and Firebase
- Utilizes the RAWG API to retrieve game data and display it on the site
- Tailwind CSS framework used to ensure a responsive design across all devices
- Features include game search, detailed game information, user authentication, and user reviews/ratings
- Firebase Firestore used for storing user data. Users can create accounts and save favorite games

Social Media Clone | [Website](#) | [GitHub](#)

- Built a Social Media clone using Next.js and JavaScript as the primary programming languages.
- Utilized Next.js to handle server-side rendering, routing, and API handling for a seamless user experience.
- Implemented real-time updates using web sockets and other modern technologies.
- Created a responsive and user-friendly interface using React components and styled with TailwindCSS.
- Integrated a robust user authentication using Next/Auth system to ensure secure access and data privacy.
- Deployed the application to a cloud hosting provider for easy access and scalability.

Comflix | [Website](#) | [GitHub](#)

- Developed a movie finder application using Next.js, React, and TypeScript.
- Implemented state management using Recoils to improve application performance.
- Utilized Tailwind CSS to create a responsive and visually appealing design.
- Integrated Firebase authentication and storage to securely store user data and ensure a seamless login
- Leveraged the TMDB API to fetch and display movie information, including titles, descriptions, and release dates.

Education

Frontend Developer Bootcamp

Dec 2022 – Current

Frontend Simplified

Harvard CS50

Dec 2022 – March 2023

Technical Skills

Languages: HTML5 | CSS3 (+ SCSS, BEM) | JavaScript ES6+ | Typescript

Frameworks: React (+ hooks) | Next.js | Tailwind Css

Technology: NPM | Git | Yarn | React dev tools | Firebase v9 | GitHub | Vercel
