# Experience

## **Frontend Developer Support**

Dec 2022 - Current

Frontend Simplified

- Supported 1,000+ students using HTML, CSS, Flexbox, JavaScript and React best practises
- Utilized debugging best practises using Google Chrome inspect element tooling
- Simplified difficult programming concepts including responsive website development, CSS layout, Promises and API requests
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

# <del>Projects</del>

#### Social Media Clone | Website | GitHub

- Built a Social Media clone using Next.js and JavaScript as the primary programming languages.
- Utilized Next is to handle server-side rendering, routing, and API handling for a seamless user experience.
- Implemented real-time updates using web sockets and other modern technologies.
- Created a responsive and user-friendly interface using React components and styled with TailwindCSS.
- Integrated a robust user authentication using Next/Auth system to ensure secure access and data privacy.
- Deployed the application to a cloud hosting provider for easy access and scalability.

# Comflix | Website | GitHub

- Developed a movie finder application using Next.is, React, and TypeScript.
- Implemented state management using Recoil, which helped to prevent unnecessary re-renders and improved application performance.
- Utilized Tailwind CSS to create a responsive and visually appealing design that provided a consistent user experience across different devices.
- Integrated Firebase authentication and storage to securely store user data and ensure a seamless login experience.
- Leveraged the TMDB API to fetch and display movie information, including titles, descriptions, and release dates.
- Implemented a modal UI to display movie trailers fetched from the TMDB API, allowing users to watch them without leaving the site.
- Conducted thorough testing to identify and fix errors, ensuring a smooth and error-free user experience.
